

Thank you for your time helping to plant, celebrate and discover the first Fruit Route.

Being a Fruit Route friend can be one of many things:

*Enjoying the route on bike or foot*

*Finding just one tree that you check on every now and then*

*Telling other people about the route and showing them what we have planted*

*Visiting the route once in a while and reporting any damage or concerns*

*Watering the young trees in Summer if it's very dry*

*Harvesting the trees and bushes that will bear fruit in the next two to three years and sharing with others (the nut trees and bigger fruit trees may take longer)*

*Forming a more formal group to care for the Fruit Route*

*Letting us know if anyone else would like to become involved in the project*

*Suggesting activities or events to take place along the route or just doing them!*

*Thinking of the fruit route from time to time*

A map will soon be available on the blog showing the location of the trees and their varieties..

We work in partnership with Loughborough Students Landscaping and Gardening Society.

Fruit Routes was devised by Anne-Marie Culhane working with the Sustainability Team at Loughborough University. Contact Fruit Routes
